Wind resistance

90 ^{km/h}

Maximum width

6.000 ^{mm}

Maximum height

6.000 ^{mm}

Packmax doors are a type of industrial closure designed to optimize opening and closing times in high-traffic environments, such as warehouses, logistics centers, or production plants.

These doors are characterized by a sturdy but lightweight structure, composed of a flexible PVC sheet, which packs vertically quickly and silently thanks to a motorized system.
